Alexandria, VA 22313-1450

Sir:

RECEIVED
OCT 26 2004
GROUP 3600

We, the undersigned inventors of the above-identified patent, hereby declare that:

Our residences, post offices and citizenships are as stated below next to our respective
names,

We, the named inventors, believe we are the original, first and joint inventors of the
subject matter claimed and for which a reissue patent is sought on the invention as entitled
above the specification, drawing and claims of which were filed August 18, 2000.

We hereby state that we have reviewed and understand the contents of the above-identified specification, including the claims.

We acknowledge the duty to disclose information which is known to us to be material to patentability in accordance with Title 37, Code of Federal Regulations, Section 1.56.

We hereby assert that this application to reissue the above-identified patent has been filed in order to correct a defect in that patent in that it is partially inoperative in that it claims less than the inventors had the right to claim. Reference is made to new independent Claims 50-52, 56, and 60 added to this patent by this reissue application as evidence of the newly claimed material that could have been claimed by us in the original patent, and now is being claimed by us. Specifically, Claim 50 does not include the limitations "in a substantially conical pattern" and "thereby causing said centroid of said electromagnetic radiation to be in a substantially invariant relationship to the emitter of said radiation regardless of the angle from which the centroid of emitted radiation is viewed" of Claim 1. Further, Claim 51 does not include the "in a substantially conical pattern" limitation of Claim 42; Claim 52 does not include the "wherein said radiation emission has a centroid such that it at least closely approximates a point source of said radiation thereby causing said centroid of said electromagnetic radiation to be in a substantially invariant relationship to the emitter of said radiation regardless of the angle from which the centroid of emitted radiation is viewed;" and "a power supply for said electromagnetic radiation generator" limitations of Claim 20; Claim 56 does not include the "wherein said radiation emission has a centroid such that it at least closely approximates a point source of said radiation thereby causing said centroid of said electromagnetic radiation to be in a substantially invariant relationship to the emitter of said radiation regardless of the angle from which the centroid of emitted radiation is viewed" limitations of Claim 20; and Claim 60 recites only three method steps compared to the method of Claim 42.

We further assert that this application to reissue has been filed in order to correct an error in the manner in which the angle of the radiation beam is characterized; degrees not being the conventional, preferred manner of referring to a solid angle. Reference is made to the amended claims in this regard where the language "180°" is replaced by "a hemisphere".

Every error in the patent, which was corrected in the present reissue application, including errors not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant. They were discovered as a consequence of this patent being routinely reviewed by one of the inventors.

We hereby declare that all statements made herein of our own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent reissued thereon.

POWER OF ATTORNEY: I hereby appoint as my attorney or agent, with full powers of substitution and revocation, to prosecute this application and transact all business in the Patent and Trademark Office connected therewith:

J. William Frank, III (Reg. No. 25,626)
 William E. McCracken (Reg. No. 30,195)
 Anthony G. Volini (Reg. No. 48,016)
 Thomas P. Riley (Reg. No. 50,556)
 Erin J. Fox (52,261)
 Kelly J. Smith (53,611)
